TASK LIST

Web Development and Designing

TASK 1

portfolio

Your assignment is to create a portfolio website using HTML, CSS, JavaScript, and optionally, React. This project will allow you to showcase your web development skills and creativity.

Feel free to explore YouTube tutorials to enhance your understanding and implementation. Your website should highlight your accomplishments, projects, and personal information. Remember to incorporate responsive design principles for optimal user experience.

We are excited to see your impressive portfolio websites! Show us what you've got!

Good luck, and don't hesitate to ask for guidance along the way.

PORTFOLIO

TASK 2

As part of your internship experience, we are assigning you to create a website with a web application using HTML, CSS, and JavaScript. You have the option to incorporate React as well, and we encourage you to refer to relevant YouTube tutorials for guidance.

This project will provide you with valuable hands-on experience in web development and enhance your skills in front-end technologies. Your task is to design and build a user-friendly and visually appealing web app, showcasing your creativity and problem-solving abilities.

We look forward to seeing your innovative websites and the growth you will achieve through this project.

Best of luck!

TO DO LIST WEBAPP

TASK 3

Your assignment is to create a web application for the classic game of Tic Tac Toe.

The website should be built using HTML, CSS, and JavaScript. If you are familiar with React, feel free to incorporate it into your project.

This will be a great opportunity for you to showcase your web development skills and learn more about front-end technologies. To assist you in your journey, you can refer to YouTube tutorials or any other relevant resources. We look forward to seeing your creativity and problem-solving abilities in action.

Good luck!

TIC TAC TOE GAME

TASK 1

As part of your internship experience, we would like each of you to create a website for a landing page web application. This project will involve utilizing HTML, CSS, and JavaScript to design and develop an engaging and visually appealing website.

To help you with this task, we encourage you to refer to various online resources, including YouTube tutorials, which provide step-by-step guidance on website development. These tutorials can offer valuable insights and techniques to enhance your skills in web development.

By completing this project, you will gain hands-on experience in front-end development and strengthen your understanding of web technologies. We look forward to seeing your creative designs and innovative approaches in building the landing page web application.

Best of luck with your assignment!

LANDING PAGE TEMPLATE

TASK 2

We have an exciting new task for all of you! As part of your internship, we would like each of you to create a website featuring an analog clock web application. This project will require your skills in HTML, CSS, and JavaScript to design and develop a functional analog clock that accurately displays the current time.

To assist you in this task, we recommend referring to YouTube tutorials that provide helpful guidance on **creating analog clocks using web technologies.** These tutorials will offer valuable insights and techniques to enhance your understanding of front-end development.

Through this project, you will gain practical experience in web development and deepen your knowledge of HTML, CSS, and JavaScript. We can't wait to see your unique interpretations and innovative designs for the analog clock web app.

Good luck with your assignment!
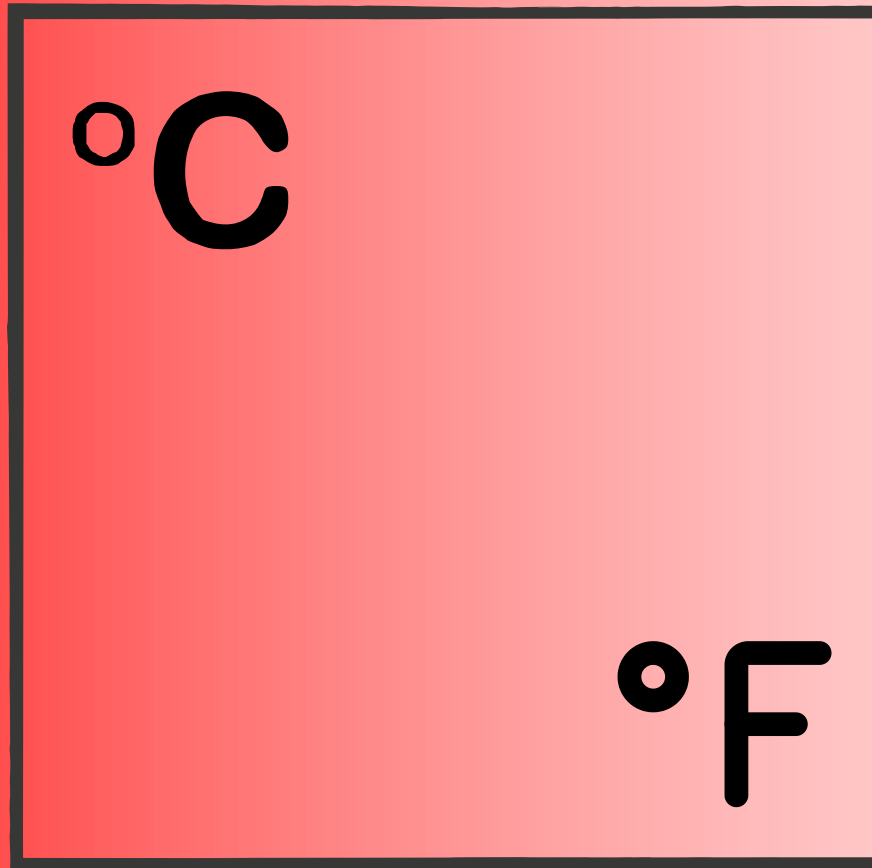

ANALOG COCK WEBAPP

TASK 3

We have an exciting task for all of you! As part of your internship, we would like each of you to create a website for a temperature converter web application. This project requires you to use HTML, CSS, and JavaScript to design and develop a user-friendly interface that allows users to convert temperatures between Celsius and Fahrenheit.

To assist you in this task, we recommend referring to YouTube tutorials that provide step-by-step guidance on building **temperature converter web apps.** These tutorials will offer valuable insights and techniques to enhance your front-end development skills.

By completing this project, you will gain practical experience in web development and deepen your understanding of HTML, CSS, and JavaScript. We look forward to seeing your innovative designs and intuitive functionality for the temperature converter web app.

Best of luck with your assignment!

TEMPERATURE CONVERTER

TASK

We are excited to assign you a task that will enhance your web development skills.

Your assignment is to create an E-commerce web application using HTML, CSS, and JavaScript. You have the freedom to explore backend technologies as well to ensure a complete and functional website. Feel free to utilize online resources like YouTube for guidance and inspiration. This project will provide you with hands-on experience in designing user-friendly interfaces, implementing dynamic features, and understanding the fundamentals of E-commerce.

We encourage you to collaborate, ask questions, and showcase your creativity throughout this assignment. Good luck, and we look forward to seeing your impressive web apps!

Vision & Mission

Company Vision

At Code Casa, our vision is to become the largest student community, empowering individuals through diverse domain internships that not only enhance their skills but also elevate their LinkedIn profiles for better placement opportunities. We believe in the power of networking and its impact on one's professional journey. With our commitment to fostering a strong community, we aim to create a thriving ecosystem where students can connect, collaborate, and achieve their dreams. Together, we will build a future where Code Casa is synonymous with endless opportunities and success.

Company Mission

Our mission at Code Casa is to empower students by providing them with diverse internship opportunities across various domains. We believe in the transformative power of internships to enhance skills, enrich LinkedIn profiles, and pave the way for successful career placements. Together, we aim to build Code Casa into the largest student community, where networking becomes the key to unlocking individual and collective success. "Your network is your net worth."
